What's The Weather Like

A mobile application created in react native to get weather information of any city in US.

All weather related information is obtained using openweathermap.org API.

Apart from basic input validations and weather information, the app demonstrates concepts like navigation, props and states in React components.

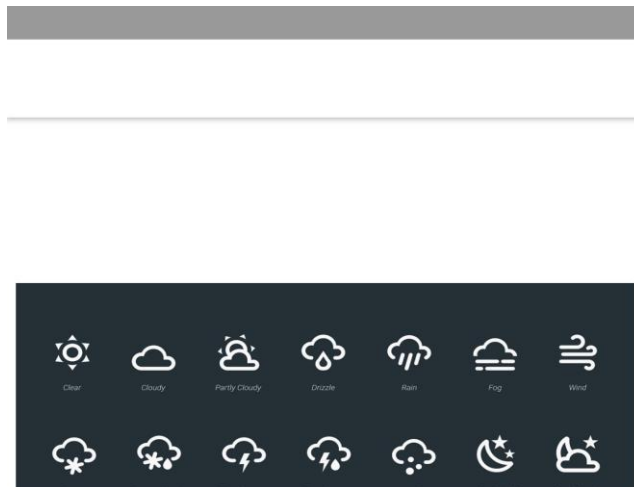

Technology Stack:

React Native

Packages:

React Navigator 1.0.0

Screenshots:

What's the weather like?

Single app for all the weather information

Enter city name

GET THE WEATHER

@Powered by openweathermap.org
